At the beginning of the event, Petteri Niskanen introduced the space to the students. After the presentation of the space, the students, guided by the teachers, created treasure maps in which they reflected on their future goals. The event was a very free format so that a good atmosphere was created that motivates the students to the project. The students were happy to go outside of the classrooms and felt privileged to be in this project. Students got to know each other better and they began to think of partners to create business ideas with. At the end of the event, students were also asked for feedback on the day. Students felt the event was nice, interesting and fun.
